DEV BHATT

Full-stack application developer focused on intuitive user experiences and back end optimization for reliability, efficiency and speed.

EDUCATION

Rochester Institute of Technology   **Expected 2022**

B.S Web and Mobile Computing

B.S Digital Humanities and Social Sciences (2nd Major)

Major Specific GPA - **3.87**

Dean's List (Fall 2019 - Present)

WORK EXPERIENCE

Front-End Engineer   **Summer 2017**

Holidays & More   *Gujarat, India*

- Revamped the company's main website which **previously looked dated and lacked functionality** causing a decrease in client engagement.
- **Designed High Fidelity Wireframes** and Mockups using industry standard tools with a specific attention to User Experience.
- **Implemented** a fully functional responsive website and was responsible for deployment and saw an **increase in client engagement**

PROJECTS

TigerPlace (Online Market Place) (Hackathon Project)

- **RIT's Student-to-Student recycling/reuse marketplace didn't allow potential customers to easily see what was available.** So we created an online market place to facilitate transactions and make it easier for potential customers to buy what they want.
- **Created interface prototypes** and conducted **A-B Tests** with potential customers. Final product was implemented using **Flask** on a relational database (MySQL)
- Early prototype **garnered interest from major stakeholders** as well as **funding** to continue development

Social Engagement Bot

Developed an Instagram bot using **Python** and **Selenium** web-driver that scrapes data off Instagram and performs specific actions based on the data it collected

Whack-A-Mole!

Implemented a networked, multiplayer version of the famous arcade game Whack-A-Mole in **Java** using **Java FX and Java socket programming**.

Tools and Skills

- **Tools:** Java, Python, Flask, Slack, Trello, HTML, CSS, PHP, SQL, GIT
- **Languages:** English, Hindi (Proficient), Gujarati (Conversational)
